PROFESSIONAL SUMMARY

Early-career GIS and Remote Sensing graduate with a BSc (Hons) in GIS from the University of Peradeniya. Hands-on experience in climate risk analysis, drought and flood mapping, and irrigation-related GIS through academic research and a government internship. Skilled in ArcGIS, QGIS, Google Earth Engine, and Python-assisted spatial analysis. Seeking an entry-level GIS/Remote Sensing role to support data-driven environmental and planning projects.

CORE TECHNICAL COMPETENCIES

- **GIS & Remote Sensing Tools:** ArcGIS Pro | ArcMap | ArcGIS Online | QGIS | Google Earth Engine | ERDAS IMAGINE | ENVI (basic) | AutoCAD | GeoServer | Esri CityEngine
 - **Programming & Data Handling:** Python (GIS automation & spatial analysis) | R (basic) | Geodatabase management | QA/QC | Spatial data integration & processing
 - **Satellite & EO Data:** Landsat | Sentinel | MODIS | Vegetation indices | Land-surface datasets | LULC classification
 - **Climate & Hazard Analysis:** Flood hazard mapping | Drought vulnerability assessment | Remote sensing-based climate indicators | hydrological & watershed analysis | MCDA
 - **Visualization & Reporting:** Thematic maps | Analytical charts & tables | Technical reports & research documentation | ArcGIS Online dashboards & web maps
-

PROFESSIONAL EXPERIENCE

GIS Analyst Intern

GIS Branch, Irrigation Department – Head Office, Colombo 07

April 2025 – October 2025

- Supported GIS-based analysis for irrigation planning, flood-related assessments, and sustainable water-resource management.
 - Conducted spatial data collection, digitization, validation, and geodatabase management following institutional QA/QC standards.
 - Produced thematic and hazard maps using ArcGIS Pro and QGIS.
 - Assisted in remote sensing analysis integrating satellite imagery with GIS layers.
 - Collaborated with multidisciplinary teams to deliver decision-support maps and reports.
-

EDUCATION

Bachelor of Science (Hons) in Geographical Information Science (GIS)

University of Peradeniya | 2021 – 2025 | Cumulative GPA: 3.288

Relevant Coursework & Academic Focus: GIS & Spatial Modelling | Remote Sensing & Image Processing | Urban & Health GIS | Hydrology & Watershed GIS | Environmental & Agricultural GIS | Climate Applications | Cartography & Surveying | Photogrammetry & Aerial Interpretation | Land Surveying | Climatology & Geomorphology

G.C.E. Advanced Level Examination

A / Galenbidunuwewa Central College | 2019 | Arts Stream | 3 A's | Z-score: 1.942

G.C.E. Ordinary Level Examination

A / Galenbidunuwewa Central College | 2016 | 6 A's, 2 B's, 1 C

SELECTED PROJECTS & RESEARCH

Final Year Research Project: Geospatial Delineation of Climate-Smart Agricultural Zones in Anuradhapura District: A Remote Sensing-Based Approach to Enhancing Drought Resilience.

- Developed climate-smart agricultural zones using GIS-based MCDA and integrated land use, environmental, and climatic data.
 - Conducted drought vulnerability assessment using NDVI, NDDI, and climate-related indicators.
 - Produced spatially explicit maps and analytical outputs to support climate-resilient agricultural planning and policy.
-

CERTIFICATIONS & TRAINING

Esri GIS Training Courses | Python for Beginners – University of Moratuwa | Python for Programming – University of Moratuwa | Introductory Computer Programming (Python) – University of Peradeniya | R Programming - Great Learning Academy

ADDITIONAL INFORMATION

Languages: Sinhala – Native | English – Proficient

Professional Skills: Analytical & critical thinking | Climate- and data-driven problem solving | Technical reporting & documentation | Attention to detail & data accuracy | Independent & interdisciplinary team work | Strong commitment to methodological transparency & quality
