Professional Summary

A results-driven Geospatial Information Systems (GIS) professional with a BSc (Hons) in GIS from the University of Peradeniya, specializing in spatial analysis, remote sensing, and geospatial data management. Proficient in a wide range of geospatial software and Python-based GIS tools. Experienced in spatial analysis, geospatial modeling, and thematic mapping for key applications including environmental, hydrological, agricultural, and resource management through academic and internship projects. Demonstrates strong analytical, problem solving, and teamwork skills, with a proven ability to deliver accurate, high-quality spatial outputs. Dedicated to leveraging geospatial technologies to support sustainable resource management and evidence-based decision-making.

Education

- Bachelor of Science in Geographical Information Science (GIS)**
University of Peradeniya
Cumulative GPA: 3.288
2021 - 2025
- Advanced Level**
A/ Galenbidunuwewa Central Collage
Arts: 3 A's (Z score - 1.942)
2019
- G.C.E. Ordinary Level Examination**
A/ Galenbidunuwewa Central Collage
6A's, 2B's, 1C
2016

Professional Experience

GIS Analyst Intern

Irrigation Department – Head Office, Colombo 07
April 2025 – October 2025

- Conducted GIS-based spatial analysis and mapping to support irrigation planning and sustainable land/water resource management.
- Performed spatial data acquisition, digitization, and geodatabase management to maintain accurate and organized spatial datasets.
- Executed QA/QC processes to ensure integrity and consistency of spatial and attribute data.
- Utilized geospatial software including ArcGIS Pro, ArcMap, ArcGIS Online, QGIS, Google Earth, and AutoCAD for map production, thematic analysis, and data visualization.
- Assisted in data collection, preparation, and remote sensing tasks for departmental GIS projects.

Projects & Research

Final Research:

Geospatial Delineation of Climate-Smart Agricultural Zones in Anuradhapura District: A Remote Sensing-Based Approach to Enhancing Drought Resilience

- Conducted geospatial analysis to identify climate-smart agricultural zones.
- Utilized remote sensing techniques and GIS-based multi-criteria evaluation (MCE).
- Integrated climate, soil, and land-use data to support sustainable agriculture and resource management.

Selected Academic & Practical GIS/Remote Sensing Projects:

Environmental Risk & Climate / Hydrology

- Environmental Risk & Climate / Hydrology
- Experience with drought vulnerability assessment using GIS and remote sensing indices (e.g., NDVI, NDDI).
- Ability to perform thermal remote sensing analysis for Urban Heat Island and Land Surface Temperature (LST) mapping.
- Familiar with DEM-based flood hazard analysis and watershed delineation.

Land Use, Resources & Site Analysis

- Competent in LULC classification and basic change detection techniques.
- Experience with MCDA/weighted overlay for suitability assessments.
- Familiar with soil and resource mapping using thematic GIS layers.

Technical Skills

GIS Software & Remote Sensing Tools:

- Advanced: ArcMap
ArcGIS Pro
ArcGIS Online
QGIS
Google Earth Engine
Google Earth Pro
- Intermediate: Esri CityEngine
Geoserver
AutoCAD
ERDAS IMAGINE
- Basic: ENVI
MATLAB, Octave

Programming:

- Beginner– R
- Intermediate: Python

Core Competencies

- Spatial Data Acquisition & Data QA/QC
- Geospatial Modeling
- Thematic Mapping
- Remote Sensing
- Web GIS
- Spatial Analysis

Soft Skills

- Teamwork & Collaboration
- Communication & Problem-Solving
- Analytical Thinking & Attention to Detail
- Adaptability & Initiative

Languages

- Sinhala - Native
- English - Proficient

Socioeconomic & Urban Applications

- Skilled in population and density mapping using statistical and GIS techniques.
- Experience in socioeconomic data visualisation for household and income mapping.
- Exposure to spatial clustering and accessibility analysis in urban planning.

Health Risk Mapping

- Basic experience in hotspot and cluster analysis for health-related datasets (e.g., CKD, dengue).
- Familiar with spatial statistical tools such as Moran's I, and Kernel Density Estimation.

Cartography & Base Data Development

- Experience generating terrain models (DTM/DSM), contours, and elevation derivatives from DEM/LiDAR datasets.
- Competent in hydrography mapping and digitisation of water features.

Certifications & Training

- **Esri GIS Training Courses**
Successfully completed
- **Python for Beginners – Introductory Course**
University of Moratuwa
Successfully completed
- **Python for Programming**
University of Moratuwa
Successfully completed
- **Introductory Computer Programming (Python)**
University of Peradeniya
Successfully completed
- **Introduction to R Programming**
Great Learning Academy
Successfully completed
