PROFESSIONAL SUMMARY

Early-career GIS and Remote Sensing graduate with a BSc (Hons) in GIS from the University of Peradeniya. Hands-on experience in climate risk analysis, drought and flood mapping, and irrigation-related GIS through academic research and a government internship. Skilled in ArcGIS, QGIS, Google Earth Engine, and Python-assisted spatial analysis. Seeking an entry-level GIS/Remote Sensing role to support data-driven environmental and planning projects.

EDUCATION

Bachelor of Science (Hons) in Geographical Information Science (GIS)

University of Peradeniya | 2021 – 2025 | Cumulative GPA: 3.288

Relevant Coursework & Academic Focus: GIS & Spatial Modelling | Remote Sensing & Image Processing | Urban & Health GIS | Hydrology & Watershed GIS | Environmental & Agricultural GIS | Climate Applications | Cartography & Surveying | Photogrammetry & Aerial Interpretation | Land Surveying | Climatology & Geomorphology

G.C.E. Advanced Level Examination

A / Galenbidunuwewa Central College | 2019 | Arts Stream | 3 A's | Z-score: 1.942

G.C.E. Ordinary Level Examination

A / Galenbidunuwewa Central College | 2016 | 6 A's, 2 B's, 1 C

CORE TECHNICAL COMPETENCIES

- Software & Tools:** ArcGIS Pro | ArcMap | ArcGIS Online | QGIS | Google Earth Engine | ERDAS IMAGINE | ENVI (basic) | AutoCAD | GeoServer | Esri CityEngine
 - GIS & Remote Sensing Skills:** Spatial & overlay analysis | Raster & vector data processing | Geodatabase management | Land suitability & MCDA (AHP) | Flood & drought analysis | LULC classification | Hydrological analysis | Remote sensing climate indices | Satellite data handling
 - Data, Programming & Supporting Skills:** Python (GIS) | R (basic) | QA/QC | Cartography & visualization | ArcGIS Online dashboards & web maps | Thematic maps | Reports & documentation
-

PROFESSIONAL EXPERIENCE

GIS Analyst Intern

GIS Branch, Irrigation Department – Head Office, Colombo 07

April 2025 – October 2025

- Supported GIS-based analysis for irrigation planning, flood-related assessments, and sustainable water-resource management.
 - Conducted spatial data collection, digitization, validation, and geodatabase management following institutional QA/QC standards.
 - Produced thematic and hazard maps using ArcGIS Pro and QGIS.
 - Assisted in remote sensing analysis integrating satellite imagery with GIS layers.
 - Collaborated with multidisciplinary teams to deliver decision-support maps and reports.
-

SELECTED PROJECTS & RESEARCH

- **Final Year Research Project: [Geospatial Delineation of Climate-Smart Agricultural Zones in Anuradhapura District: A Remote Sensing-Based Approach to Enhancing Drought Resilience](#).** (Developed CSA zones and drought vulnerability maps using GIS-based MCDA, NDVI, NDDI, and environmental/climatic data in GEE and ArcGIS Pro to support climate-resilient agricultural planning.)
 - [Flood Analysis - Matara, Sri Lanka](#): Conducted pre- and post-flood assessment using Sentinel-1 SAR and GIS to map affected land and infrastructure.
 - [CKD Hotspot Analysis - Anuradhapura & Polonnaruwa](#): Applied spatial statistics to identify high-risk zones, supporting targeted public health interventions.
 - [New Dams & Reservoirs Mapping - Sri Lanka](#): Developed a national GIS database of existing, under-construction, and proposed dams to support water resource management.
 - [Allai Irrigation Scheme](#): Digitized historical survey maps to generate GIS-ready contour datasets for irrigation planning and analysis.
-

CERTIFICATIONS & TRAINING

Esri GIS Training Courses | Python for Beginners – University of Moratuwa | Python for Programming – University of Moratuwa | Introductory Computer Programming (Python) – University of Peradeniya | R Programming - Great Learning Academy

ADDITIONAL INFORMATION

Languages: Sinhala – Native | English – Proficient

Professional Skills: Analytical thinking | Data-driven problem solving | Reporting & documentation | Attention to detail | Teamwork & interdisciplinary collaboration | Commitment to quality
